## **Use of Non-GAAP Financial Measures**

The unaudited condensed consolidated financial information is prepared in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP"), except that the consolidated statement of changes in shareholders' equity, consolidated statements of cash flows, and the detailed notes have not been presented. Huya uses non-GAAP gross profit, non-GAAP operating income, non-GAAP net income attributable to HUYA Inc., non-GAAP net income attributable to ordinary shareholders, and non-GAAP basic and diluted net income per ADS, which are non-GAAP financial measures. Non-GAAP gross profit is gross profit excluding share-based compensation expenses allocated in cost of revenues. Non-GAAP operating income is operating income excluding share-based compensation expenses. Non-GAAP net income attributable to HUYA Inc. is net income attributable to HUYA Inc. excluding share-based compensation expenses, gain on fair value change of investments and equity investee's investments, and equity investee's partial disposal of its investment, net of income taxes. Non-GAAP net income attributable to ordinary shareholders is net income attributable to ordinary shareholders excluding share-based compensation expenses, gain on fair value change of investments and equity investee's investments, and equity investee's partial disposal of its investment, net of income taxes. Non-GAAP basic and diluted net income per ADS is non-GAAP net income attributable to ordinary shareholders divided by weighted average number of ordinary shares used in the calculation of non-GAAP basic and diluted net income per ADS. The Company believes that separate analysis and exclusion of the impact of (i) share-based compensation expenses, and (ii) gain on fair value change of investments and equity investee's investments, and equity investee's partial disposal of its investment, net of income taxes add clarity to the constituent parts of its performance. The Company reviews these non-GAAP financial measures together with GAAP financial measures to obtain a better understanding of its operating performance. It uses the non-GAAP financial measure for planning, forecasting and measuring results against the forecast. The Company believes that non-GAAP financial measure is useful supplemental information for investors and analysts to assess its operating performance without the effect of (i) share-based compensation expenses, which have been and will continue to be significant recurring expenses in its business, and (ii) gain on fair value change of investments and equity investee's investments, and equity investee's partial disposal of its investment, net of income taxes, which both may recur when there is observable price change in the future. However, the use of non-GAAP financial measures has material limitations as an analytical tool. One of the limitations of using non-GAAP financial measures is that they do not include all items that impact the Company's net income for the period. In addition, because non-GAAP financial measures are not measured in the same manner by all companies, they

may not be comparable to other similar titled measures used by other companies. In light of the foregoing limitations, you should not consider non-GAAP financial measure in isolation from or as an alternative to the financial measure prepared in accordance with U.S. GAAP.

The presentation of these non-GAAP financial measures is not intended to be considered in isolation from, or as a substitute for, the financial information prepared and presented in accordance with U.S. GAAP. For more information on these non-GAAP financial measures, please see the table captioned "HUYA Inc. Reconciliations of GAAP and Non-GAAP Results" near the end of this release.
